

## Lo-Eurricular Activities

CO-CURRICULAR ACTIVITIES give students an opportunity to extend their skills and capabilities beyond the curriculum. By making a positive contribution to school and the wider community our girls build their confidence, challenge themselves and form friendships with students in all year levels. Whether it is an interest in creative, sport or academic pursuits or making a difference through community and environmental outreach projects, all girls will find something that sparks their curiosity and ignites their passions. Our co-curricular programs continue to evolve, reflecting the interests and needs of our students.
